

## Altea Evolution

# Hardware Producers

Telematics is a field that has seen unprecedented growth, which according to most forecasts is likely to continue. Producers of on-board devices find themselves right in the centre of the storm. The potential is immense.

**ALTEA's OPEN TELEMATICS PLATFORM gives life to your device and opens the door to a wide spectrum of applications and markets.** GPS hardware is needed today by a widely varying typology of clients, such as: insurance companies, authorities, car manufacturers. Each with different needs.

**ALTEA's open telematics platform HAS BEEN DEVELOPED WITH THIS IN MIND.** To provide a proper solution to each stakeholder. OTP helps hardware manufacturers present dedicated solutions to their clients.

### Open Telematics Platform

**ALTEA's Open Telematics Platform** is easily adaptable for use in a variety of key telematics projects, ranging from Safety & Security services (such as anti-theft vehicle tracking and eCall), Fleet Management, Insurance Models (such as Pay-As-You-Drive, Pay-Per-Use), Traffic Management and Remote Diagnostics. The platform works with virtually any on board device, numerous protocols and different mapping systems. **The system is based on 6 main modules: BASIC, (FMA) Fleet Management Application, (IPS) Insurance Profiling System, (PAM) Public Administration Module, (RDS) Remote Diagnostic System and (FAC) Financial Assets Control.**

They share the same data and present information in different ways based on the need of the stakeholder. Data filters are provided by a highly flexible and customizable web service integrated with the customer's or the stakeholder's information system in an easy to read format.
